

Møssbeck is an electronic music composer making melodic drum and bass with love, precision and a hardware tracker.

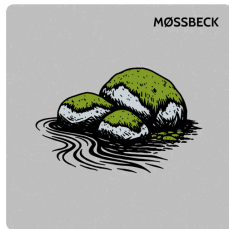

Short bio

Møssbeck is an electronic music project that has been around since 2021; behind it, more than 50 releases, ranging from Dub to Happy Hardcore- nowadays it's more Drum and Bass with big and small melodies. The music is written on a hardware tracker and an acid clone synth brings the tracks to life- everything is made, mixed and mastered at home. Every release on Bandcamp is free to use, no Content ID on those tracks. Credit is appreciated :-)
